VOL. 17, No. 3

PUBLISHED BY LAGO OIL & TRANSPORT CO., LTD.

February 11, 1956

DOTTED LINE traces the new roadway designed to reduce traffic congestion for employees bound to and from work through Lago Colony.

Island's Servicenters Adding Esso Extra

Additional Pumps Also Planned To Speed Customer Service

In order to provide Aruba's motorists with better service and a new, higher-powered gasoline, the island's Esso Servicenters will be under renovation for about two months.

The work is tentatively scheduled to be in progress from Feb. 15 through April 15. It will include installation of new gasoline pumps, relocation of existing pumps and pump "islands" and replacement of one station.

The project will necessitate closing all stations for periods ranging from a few days to one month. The project timetable has been set up, however, to insure that gasoline and other automobile services will be available at one station or another throughout the two-month period.

During this time motorists may experience some temporary inconvenience or service delay. But more gasoline pumps in more efficient locations will mean - when the work is completed - that the six Esso stations on the island will be able to handle more cars more quickly in the future.

And they will offer a new, improved grade of Esso EXTRA gasoline. Motorists have been asking for a gasoline that would provide quicker starts and faster acceleration in addition to economical operation. The Esso dealers agreed to answer these requests by making Esso EXTRA available.

To provide additional pumping facilities for handling the new fuel, they contracted for a number of new "twin" pumps.

These pumps are equipped with two motors, two registers and two hoses through which they will be able to deliver Esso regular or Esso EXTRA gasoline. The pumps will be painted white with the distinctive Esso trim colors - red for Esso regular and blue for Esso EXTRA.

Some existing single pumps will be converted to handle Esso EXTRA gasoline and some new single pumps will be installed. When the work is completed the number of Esso pumps throughout the island will be 22. Nine will handle Esso EXTRA.

Work has already begun on a new station in Lago Colony. The replacement for the existing station will be located adjacent to a new by pass road designed to reduce traffic congestion on the streets leading toward the Sea Grape Gate.

Servicenters Lo Ofrece Mehor Gas, Servicio

Pa ofrece mehor servicio y un gasoline nobo, di alta potencia, na motoristanan di Aruba, e Esso Servicenters di e isla lo ta bao renobacion pa mas of menos dos luna.

E trabao, segun plannan provisional, lo ta den progreso for di Feb. 15 te April 15. Esaki lo inclui instalacionnan di pompnan nobo di gasoline, cambio di sitio di e pompnan actual y reemplazo di un di e stacionnan di servicio.

E proyecto lo necesita cerramento di tur e stacionnan pa periodo nan variando for di algun dia pa un luna. E schema segun cual e proyecto ta worde ehecuta, sin embargo, a worde planea na un manera pa asegura cu gasoline y otro servicenters pa auto lo ta disponible na un stacion of otro durante henter e periodo di dos luna.

Durante e tempo aki motoristanan por encontra algun inconveniencia temporario of tardanza den servicio. Pero mas pomp di gasoline na sitionan mas eficiente lo nifica - ora e trabao ta cla - cu e seis stacionnan di servicio Esso ariba e isla lo ta capaz pa duna servicio na mas auto, mas rapidamente den futuro.

To Start In 2nd Quarter

New Road Designed To Relieve Congestion

Lago has completed plans for construction of a new road designed to reduce traffic congestion for employees driving to and from work through Lago Colony.

The road, scheduled to be completed later this year, will connect the main refinery road with 10th Ave. and by-pass the chronic traffic congestion points within the colony.

Leading off from the main refinery road between the Telephone Exchange Building and the old Esso Dining Hall, the road will run almost due north past the proposed Administration Building, turn northeast between the Training Building and Bachelor Quarters No.

6, pass west of Guest House No. 8, then bear due east and run straight to an intersection with 10th Ave. just west of 2nd St.

10th Ave. connects with the main refinery road below Lago Hospital. Employees bound to and from work via the Sea Grape Gate will, by using the new road, avoid the congestion which now exists in the vicinity of the Esso Post Office, the two Five Corners where 3rd St. and 7th Ave. cross the main refinery road and points along the way.

Work on the new road is tentatively scheduled to start in the second quarter of 1956 and be completed before the end of the year.

Lago Lo Traha Camina Nobo Pa Empleadonan

Lago a completa plannan pa trahamento di un camina nobo designa pa reduci congestion di trafico pa empleadonan bini y bai for di trabao door di Lago Colony.

E camina, cual ta planea pa bin cla mas laat e anja aki, lo conecta e camina mayor di refinaria cu Avenida 10 y pasa un banda di e puntonan den colonia unda semper tin congestion di trafico.

Saliendo for di e camina mayor di refinaria entre Telephone Exchange y Esso Dining Hall, e camina ta corre casi derecho nord dilanti e edificio proponi, bira nordoost entre Training Building y Bachelor Quarters No. 6, pasa pabao di Guest House No. 8, y sigui derecho ariba te unda e ta bai uni cu Avenida 10 poco pabao di 2nd Street.

Avenida 10 ta conecta cu e camina mayor di refinaria net pabao di Hospital. Empleadonan na camina

Festive Air Sweeps Aruba

Island Carnival Queen Election Tonight

Tonight the most beautiful girls in Aruba will vie for the cherished crown of Carnival Queen. Elected by their own clubs and organizations, the aspiring young ladies will appear at 8 p.m. in Wilhelmina Stadium to compete for the title. To the victor will go not only the title of Carnival Queen, but the privileged spot in the lead car of the Grand Carnival Parade tomorrow.

The parade will take place in Oranjestad and will make up on Lloyd G. Smith Boulevard. Its starting time has been announced as 3 p.m. The parade will wind its way through Oranjestad and end up at Wilhelmina Stadium.

Actually, this is the big carnival weekend. Yet, the spirit of carnival swept the island last weekend when the first ceremonies involving the Prince of Carnival were held. The island's many clubs and organizations elected their own princes to compete against each other for the coveted title. Paules Diaz of Savaneta, the choice of the Comman-

deursbaai Club, was elected to reign as prince. Called Prins Poepie I, he was formally received by Lt. Gov. L. C. Kwartzs Feb. 5. A parade with the prince as center of attraction followed his meeting with Dr. Kwartzs.

At 4:30 this afternoon, Prins Poepie I will lead a carnival parade for children at the Lago Sport Park. Following his appearance at the Sport Park, the prince of carnival time will be the guest of honor at the Royal Dinner to be served at the Trocadero.

From the Trocadero the prince will go to Wilhelmina Stadium to

witness the parade of queen candidates. There he will be ready to take his place beside the young lady who is selected Carnival Queen.

Sunday's parade will be on as big a scale as last year's in size, color and pagentry. Clubs and organizations from all over the island have floats prepared to join in the grand parade. The floats will all be decorated and most assuredly will carry a lady fair. Reports have it that the vehicles that will make up the parade will include everything from small jeeps to large flat bed trucks. In between will be the ever-colorful convertibles seen around the island.

It will indeed be a splash of vivid color on the Aruban scene that only a carnival can bring out. Once again, its gay carnival time in Aruba!

SPAC Primario Skedula Pa Feb, 15, 16 y 17

Diez-un candidato nacional y tres no-nacional lo aparece ariba lista di candidato pa Special Problems Advisory Committee pa e eleccion cual ta tuma lugar Feb. 15, 16 y 17. E votamento ariba Diarazon, Diahuebes y Diabierna otro siman lo ta e eleccion primario pa cinco puesto. E eleccion final ta sigui un siman despues, Feb. 22, 23 y 24.

Tanto e eleccion primario como final ta worde teni den un forma similar na e eleccion di LEC na December.

Tin cinco posicion habri den SPAC, dos no-nacional y tres nacional. Normalmente, e eleccion anual di e grupo lo a involve solamente tres puesto. E anja aki, sin embargo, dos di su oficialnan, Max Vries y G. E. Fernandes, a worde eligi como miembro di Lago Employee Council. E posicionnan vacante di Sr. Vries y Sr. Fernandes ta pa un anja di duracion mientras e tres puestonan regular ta pa dos anja.

Den e eleccion primario tin ocasion pa scribi number di un candidato ariba e lista. Diez number lo aparece ariba e lista final. E seis nacionalnan cu sali mas halto den

e primario lo bai ariba e lista final y tambe e cuatro no-nacionalnan cu reciwi mas tanto voto. Pa haya cuatro candidato no-nacional ariba e lista final, e posicionnan lo worde yena door di votonan scribi aden.

Compitiendo ariba e lista nacional ta:

W. C. Hopmans, un machinist A den Mechanical Department cu 19 anja y 10 luna di servicio.

Ambiente Festivo Na Aruba

Awe Noche Eleccion Di Reina Carnaval

Awe noche e mucha muhernan mas bunita na Aruba lo competi pa e corona anhelá di Reina Carnaval. Eligi door di nan mes club y organizacionnan, e senjoritanan hoben lo parece pa 8 p.m. den Wilhelmina Stadion pa competi pa e titulo. E ganador lo haya no solamente e titulo di Reina Carnaval, pero e lugar principal den e parada grandioso di carnaval manjan.

E parada lo tuma lugar na Oranjestad y lo bini hunto ariba Lloyd G Smith Boulevard. Su ora di cuminsa a worde anuncia como 3 p.m. E parada lo pasa door di Oranjestad y termina na Wilhelmina Stadion.

En realidad, esaki ta e fin di siman ariba cual carnaval ta worde celebra. Sinembargo, e ambiente di carnaval tabata den henter e isla siman pasá caba ora e promer ceremonianan involuendo Prins Carnaval a worde teni. E hopi club y organizacionnan a eligi nan mes prinsnan pa competi cu otro pa e titulo anhelá. Paulus Diaz di Savaneta, exun di Commandeursbaai Club, a worde eligi pa goberna como prins. Yamá Prins Poepie I, el a worde oficialmente recibí door di Gezaghhebbor Kwartzs Feb. 5. Un parada cu e prins como centro di atraccion a sigui despues di e encuentro cu Dr. Kwartzs.

Pa 4:30 awe tramerdia, Prins Poepie I lo ta na eabez di un parada di carnaval pa muchanan na Lago Sport Park. Despues di su aparicion na Sport Park, e prins di carnaval lo ta huesped di honor na e Comida Real en ta worde sirbi na Trocadero.

For di Trocadero e prins lo bai Wilhelmina Stadion pa mira e parada di candidatanan pa e titulo di reina. Aya el lo ta cla pa tuma su lugar banda di e senjorita cu worde selectá como Reina Carnaval.

E parada di Diadomingo lo ta uno mes grandi cu esun di anja pasá, tanto den tamanjo y buniteza. Club y organizacionnan for di henter e isla tin flotanán cla pa partiepa den e parada grandi. Tur e flotanán lo worde decorá y easi segur lo tin un mucha muher bunita ariba. Segun noticia e vehiculonan cu lo forma e parada lo ta di tur sorto for di jeep te truck grandi plat. Mei-mei di nan lo tin e coloroso autonon convertible cu hende por mira den henter e isla.

Seguramente e lo ta un buniteza ariba enseña Arubano cu solamenten carnaval ta saca afor. Un vez mas, tempo di carnaval ta den na Aruba!

British Consul Expands Service

British Consul H. C. Rabbetts opened a new service for British subjects in Aruba last Wednesday when he conducted consulate business in Lago's Employment Annex at the Main Gate from 4 to 6 p.m.

The new service was provided primarily as a convenience for Lago's British day-workers who find it difficult to visit the consulate in Oranjestad during working hours.

The service is an experiment and will be available each Wednesday from 4 to 6 p.m. through Feb. 29. It will be continued past that date on a schedule warranted by demand.

Servicenters

(Continúa di pagina 1)

Y nan lo ofrece na mes tempo un grado nobo, mehorá di gasoline Esso EXTRA. Motoristanan a pidi un sorto di gasoline cu lo duna startmento mas rapido, aceleracion mas liher hunto cu operacion economico. E agentenan di Esso a combiná pa cumpli cu e suplica aki door di pone Esso EXTRA disponible.

Pa haya mas pompan pa dispensa e combustible nobo, nan a encarga algun pomp "doble" nobo.

E pompan aki ta bini cu dos motor, dos registrador y dos hose door di cual nan por entrega sea gasoline Esso regular of Esso EXTRA. E pompan lo worde gevef den e eolonan distintivo di Esso - blanco cu corrá pa gasoline Esso regular y blanco cu blauw pa Esso EXTRA.

Algun di e pompan singular actual lo worde converti pa trata gasoline Esso EXTRA, y algun pomp nobo singular lo worde instalá. Ora e trabao ta cla, e cantidad di pompan Esso den henter e isla lo yega un total di 22. Nuebe lo dispensa Esso EXTRA.

Life Insurance Coverage Put Into Effect Feb. 9

Group life insurance protection went into force Thursday, Feb. 9 for Lago employees who enrolled in the plan by that date. The plan is still open to staff and regular employees who have not yet signed up.

The American Life Insurance Co., which is underwriting the plan that is being sponsored by the Special Problems Advisory Committee, agreed to put the plan into effect though 75 per cent of the staff and regular employee group had not enrolled.

The insurance company had originally set 75 per cent or some 4200 employees as the percentage needed before the company could assume the risk. In announcing that the group plan had been put into effect, however, American Life said the average age of the employees who had enrolled - 36.6 years - made the average life expectancy of sufficient length to warrant assuming the risk.

Employees wishing to sign up for insurance may do so at the SPAC office with A. Zambrano at the Industrial Relations Department building and the Employment Annex at the Main Gate.

Personal di Lago Usá den Cuatro Show di Radio

Seis empleadonan di Industrial Relations Department y dos estudiante di High School a haer un entrada den actuacion dilanti radio luna pasá pa apoya e programa di aseguro di bida en grupo ofreci na Lago.

E medio pa cual nan a yega dilanti radio tabata cuatro show di familia - na Papiamento y Holandes - uno munstrando e situacion di un homber y su esposa y e otro un mama típico y tata y un familia di dos yiu. Tur dos show tabata hungá na cas, tur dos net promer cu cena. E dialogo tabata splica aspectonan di e aseguro cu ta worde ofreci, su beneficiónan y loke e ta nifica, particularmente pa un familia. Esaki tabata Lago su promer entrada den presentacion dilanti radio.

E actor y artistanan nobo ta Sra. Gerda Kenson, Srtas. Susan Eaton y Gayle Schlageter y Rumold D. Oroseo, kende a trata e presentacion Ingles, y Sra. Lorna St. Paul, Srta. Marcelina Werleman, Carlos de Cuba y Andres Tromp, estudiante di Lago Vocational School, cu a actua e parti na Papiamento.

E shownan a worde sirbi y dirigí door di W. C. Hochstahl, Jr. y H. A. Turton di Public Relations Department.

"ON LOCATION" in Lago's Main Shops, a group of students from the City College of New York shoot some of the final scenes of a moving picture about Aruba. Back in New York the students, working toward a degree in movie-making, will edit the film for showing here and abroad.

"NA NAN LUGAR" den Main Shops di Lago, un grupo di estudiante for di City College di New York ta saca algun di e escenas final di un pelicula di Aruba. Na New York e studentenan cu ta traha pa un grado den trahamento di pelicula, lo edita e pelicula pa worde munstrá aki y den entranheria.

Kendall Co-Authors Book On Personnel Selection

Dr. William E. Kendall, Lago's personnel studies coordinator, has co-authored with Dr. C. Harold Stone of Creole a book entitled "Effective Personnel Selection Procedures." The book was published last Monday by Prentice-Hall.

Dr. Kendall and Dr. Stone, who is supervisor of employment for Creole's Western Division, have long specialized in industrial psychology. Their work convinced them that a gap existed in the literature available on recruiting and selecting employees.

They felt that the personnel man in industry needed a place where he could find out about the techniques of personnel recruiting and selection and the philosophy behind the use of these techniques.

Some of the material was available to personnel men, but it was scattered throughout various publications. Drs. Kendall and Stone planned to compile, correlate and

evaluate it, include their own findings and publish the work in one volume.

The authors, who first met while students at the University of Minnesota, had come together again in the industrial relations department of the Chesapeake and Ohio Railroad. It was there, two years ago, that they started work on the book.

After outlining the material they planned to cover, they selected the chapters each would write. The manuscript was partially completed when Dr. Stone was employed by Creole in December, 1954. Five months later Dr. Kendall came to Lago.

During the past eight months they have edited the manuscript, read galley and page proofs and readied the book for publication. Working in two countries, much of their collaboration has been by mail.

When the book appeared it was 433 pages long. Illustrated throughout with examples of forms, questionnaires, tests and other devices needed in a successful personnel selection program, it also contained instruction on guides and techniques available nowhere else.

Some of the material written by Dr. Stone, Dr. Kendall said, is the best published on the subject to date. He mentioned in particular Dr. Stone's chapters on "Manpower Resources in the Company," "Outside Sources for New Employees" and "Recruiting Techniques - How To Get Them In."

The subjects of two of Dr. Kendall's chapters had been scarcely touched on previously in personnel literature. They are "The Physical Examination" and "Developing an Effective Testing Program."

Dr. Kendall broke into print in another volume last month. He contributed a chapter to the "Annual Review of Psychology" entitled "Industrial Psychology."

After reading between 500 and 600 books, essays, reports and other works on industrial psychology published during 1954-55, Dr. Kendall prepared an evaluation of about 140. He is the first practicing industrial psychologist asked to write the chapter for the annual review.

Lago Personnel Used on Four Radio Shows

Six Industrial Relations Department employees and two Lago High School students made an entry into radio acting last month in support of the group life insurance program offered at Lago.

The vehicle for their travels into radio time was two family shows - done in both Papiamento and English - one depicting an average man and wife situation and the other a typical mother and father and two children family. Both shows had their setting in the home, both just prior to the evening supper.

The dialogue explained the aspects of the insurance being offered, its benefits and what it means, particularly to a family. It was Lago's initial entry in radio presentation.

The newly-created actors and actresses are Mrs. Gerda Kenson, the Misses Susan Eaton and Gayle Schlageter and Rumold D. Oroseo, who handled the English presentation, and Mrs. Lorna St. Paul, Miss Marcelina Werleman, Carlos de Cuba and Andres Tromp, Lago Vocational School student, who handled the Papiamento.

The shows were written and directed by W. C. Hochstahl, Jr. and H. A. Turton of the Public Relations Department. The recording of the shows was done by L. S. Mc Reynolds of the Cotony Service Department assisted by E. R. Ellis of the Public Relations Department.

AGAINST a backdrop of some of the refinery's principal units, legislators from the Netherlands, Surinam and the Netherlands Antilles were photographed earlier this month during a tour of Lago. The law-makers were the government's guests in the Antilles.

CONTRA un fondo di algun di e unidarian principal di refinaria, legisladornan for di Holanda, Surinam y Antillas Holandes a worde fotografiá anteriormente e luna aki durante un bishita na Lago. E representantenan tabata huesped di gobierno di Antillas Holandes.

SPAC Primary Set For Feb. 15, 16, 17

**Write-Ins Allowed
On Primary; Final
Feb. 22, 23, 24**

Eleven national and three non-national candidates will appear on the Special Problems Advisory Committee election ballots Feb. 15, 16 and 17. The Wednesday, Thursday and Friday voting next week will be the primary stage of the elections to fill five positions on this committee. The final elections will follow one week later, Feb. 22, 23 and 24. Both primary and final elections are being held in a fashion similar to the December Lago Employee Council election.

Open on the SPAC are five positions, two non-national and three national. Normally, this group's annual election would involve only three posts. This year, however, two of its officers, Max Vries and G. E. Fernandes, were elected to the LEC. The positions vacated by Mr. Vries and Mr. Fernandes are for one year duration while the three regularly contested seats are for two-year terms.

Write-in votes will be allowed during the primary election. Ten names will appear on the final ballot. The six top nationals in the primary will be entered on the final ballot as will the four non-nationals drawing the most votes. In order to have four non-national candidates on the final ballot, the positions will be filled through write-in votes.

Competing on the national slate are:

W. C. Hopmans, a machinist A in the Mechanical Department with 19 years and 10 months' service.

J. L. Wever, a senior engineering assistant in Project Engineering of the Technical Service Department with 18 years and 10 months' service.

Maximo Croes, a translator clerk I of the Executive Office with six years and three months' service.

J. M. Hodge, an assistant operator in Catalytic and Light Ends of the Process Department with 18 years and three months' service.

G. N. Willems, an assistant operator in Acid and Edleanen of the Process Department with 22 years and seven months' service.

L. F. Van Putten, a utilities clerk II in Utilities of the Process Department with three years and four months' service.

C. Y. Yarzagaray, a payroll clerk II (MP) in Payroll of the Accounting Department with eight years and five months' service.

H. E. Johnson, an operator in Cracking of the Process Department with 18 years and six months' service.

J. W. A. Smit, a senior instructor in the Training Division of the Industrial Relations Department with five years and six months' service.

M. L. Croes, a junior materials clerk in Material Accounting of the Department with four years and four months' service.

O. M. Williams, a senior instructor in the Training Division of the Industrial Relations Department with eight years and five months' service.

The non-national candidates are:

F. H. E. Mingo, an operator in Cracking of the Process Department with 17 years and two months' service.

S. E. Howard, an instructor A in the Training Division of the Industrial Relations Department with seven years and nine months' service.

W. E. Byron-Cox, a stenographer I in Mechanical Administration with eight years and six months' service.

Nationals up for re-election are Mr. Hodge and Mr. Willems. The non-national term that has expired is that of Mr. Mingo. Men on the coming ballot who are presently filling out the terms of Mr. Vries and Mr. Fernandes are Mr. Hopmans and Mr. Byron-Cox.

Fifty-four tellers will canvass the

Bao di e sistema nobo aki, henter e grupo di constituyentenan tin e oportunidad pa nombra esnan cu nan ta desea pa forma e lista di candidatonan.

Marchena Still Missing

Luis E. Marchena, a boatswain on the tug "Colorado Point," is still missing after the fishing boat he was in capsized off Colorado Point Jan. 28. With over 18 years' service, he was the only Lago employee of four men aboard the ship. Two swam safely to shore; the third drowned and his body was found on the north shore near the pitch piles.

In the corners, it was words of wisdom and "use your left."
Den e skinanan, tabatin palabranan di sabiduria y "usa bo robiez."

24 "Ideas" In December "Coin" Total of F. 785

Twenty-four Lago employees rang the Coin Your Ideas bell last December. The tolling of the bell was good for Fls. 785 with the top award of Fls. 100 going to E. V. Connor of the machinist craft. The other awards were for Fls. 60, 50, 35, 30, 25 and 20.

Mr. Connor's award-winning suggestion concerned the stocking of a smaller size implement in the storehouse.

Other award winners follow:

Accounting	
E. de Freytas	Fls. 30
Colony Servier	
A. E. Brown	Fls. 25
Industrial Relations	
Mrs. R. E. Aquil	Fls. 20
Mechanical Administration	
T. P. Viapree	Fls. 25
E. Morris	Fls. 20
W. Wilson	Fls. 20
Electrical	
A. Chin	Fls. 60
Col. Serv. - Hospital kitchen - Run hot water line to top of evaporator	
R. S. Ewart	Fls. 30
E. Stuart	Fls. 30
A. M. Arends	Fls. 25
Machinist	
E. V. Connor	Fls. 100
Mech. - Storehouses - Stock additional smaller sizes of KA2SMO bars	
Metal Trades	
H. P. Gittens	Fls. 35
Process C&LE	
J. J. Arrindell	Fls. 50
Proc. - C&LE - LEAR - Rearrange the refinery gas K.O. drum piping at LEAR	
J. P. Falconi	Fls. 30
J. E. Francis	Fls. 25
J. Peters	Fls. 25
J. Perera	Fls. 20
Cracking	
A. Everts	Fls. 25
LOF	
F. E. Groeneveldt	Fls. 30
Utilities	
J. W. Eerooks	Fls. 30
A. Brown	Fls. 30
Technical Service	
Lab No. 1	
A. Ras	Fls. 25
Lab No. 2	
H. A. Lopez	Fls. 25

NEW ARRIVALS

January 19	
ALBERTS, Juan - Instrument; A daughter, Maria Margarita	
January 21	
KOCK, Emilia - Rec. & Shipping; A daughter, Altiracia Melva

Program Draws Praise

Thomas Named Outstanding Boxer In Park Tourney

The Lago Sport Park Board's initial entry into the field of boxing promotion has come to a close. The ring has been removed from the park. The accolade given Huberto Thomas after he was named outstanding boxer of the tourney has drifted away with the trade winds.

Outside of a few bruises, some tenderness here and there and a few patches of discoloration, about all that remains is a memory. But what a memory!

It's the recollection of a nightly average of over 3000 people solidly patting their stamp of approval on the program developed by the Sport Park Board. The stands were packed on each of the three nights. The final night drew the best and the best was close to 4000 fans. Eager to cheer their favorites, the enthusiasm also had the effect of letting the Sport Park steering committee know that here was a program people wanted. And, above all, they would attend en masse.

The solid - and noisy - support given the entire tourney was the fan's way of unambiguously saying that "we like boxing; we like organized boxing; we like supervised bouts and tournaments; we like this way of giving the untried amateur with nothing more than a desire a place to explore this desire and to learn."

The tourney, the first in the history of the Sport Park Board, was strictly for amateurs. It was designed as a program that would not only give the fans something popular, but would also give amateurs a complete card all their own where untried pugilists could try their hand, or, better, their fists, against someone matched according to weight and ability.

The fans were appreciative, some constructive. The constructive fans voiced their opinions which all added up to "we want more; it is something Aruba boxing needs in order to keep young boxers moving along; it is an excellent sport that

can develop agility and reflexes to the delight of the participant; it is run on a fair basis affording the boxing beginners a spot in which to learn."

Perhaps the memory that will linger longest is with Huberto Thomas, named the outstanding boxer of the two fights on technical knock-outs. The first to submit to his rain of blows was Sigfrid McKay, the second was Robby Van Trigt. He lost his last fight, however, coming out on the short end of a decision with Lorenzo Abad. And, as is the crowds' prerogative, roundly voiced their disapproval. The fan's feelings were soon mollified with the announcement that he was voted "outstanding."

In the final fights, St. Clair Walter decided Dennis Webster, Meville Wilson stopped Wilfredo Kividana on a third-round TKO, Sheffield Spanner decided Poli Dael.

In a special exhibition, the fans caught a quick look at their middleweight champion, Sugar Boy Nando. Nando went a few rounds with Kid McCoy. Both boys mixed fairly freely and gave the fans a good show.

All contestants in the tourney received a memento. The tourney were presented by M. V. Shirley of the Colony Service Department. The committee in charge of the boxing was made up of Herman Figueira, chairman, Drees Geerman, Clive MacDonald, Stanley Smith, Jose Ricao and Jose LaCruz.

Freres Open New School To Relieve Over-Crowding School Nobo A Worde Habri na Oranjestad

A new school, built to serve some of the students now attending St. Dominicus College, was dedicated late last month by The Rev. J. Burgemeester.

Named St. Tarcisius College, the new school is located in Mon Plaisir and will accommodate some 260 boys from that area and Dakota.

It is the 12th parochial school for boys built on the island and will be staffed by seven freres of the Institute of the Brotherhood of Christian Schools. Construction started at last March.

The building contains eight classrooms for grades one to six and a roofed, enclosed play area. The L-shaped structure bounds a paved playground.

Relief of the present at Mon Plaisir, it is felt, will relieve for the present the most pressing parochial boys school accommodations problem. No new construction is contemplated in the immediate future.

Today there are 4031 boys attending parochial schools in Aruba. The 12 schools are staffed by 114 freres and laymen teachers.

Un school nobo, trahá pa acomoda algun di e muchanan cu avor ta bai St. Dominicus College, a worde bendicioná na fin di luna pasá door di Pastoor Burgemeester.

E school yama St. Tarcisius College y ta keda na Mon Plaisir. E por acomoda 260 mucha di e area aki y di Dakota.

E ta di 12 school parokial pa mucha homber cu a worde trahá ariba e isla. Siete frèrè lo duna les ey. Su construcion a cuminza na Maart anja pasá.

E edificio tin ocho lokaal pa un te seis klas, y un lugar di hunga cerrá cu dak ariba. Tin un patio di hunga cu vloer poni na e school nobo.

Cabamentoe di e school na Mon Plaisir lo yuda cu e problema di acomodacion den schoolnan parokial di mucha homber.

No tin idea pa ningun construcion nobo den futuro inmediato.

Awe tin 4031 mucha homber cu ta atende schoolnan parokial na Aruba. E 12 schoolnan ta worde dirigi pa 114 frèrè y onderwijzer.

THE REV. J. Burgemeester blesses one of the eight new classrooms in St. Tarcisius College (top right), at left he blesses crucifixes for the classrooms above students roam the playground outside the newly-completed school which was built to help relieve over-crowding at St. Dominicus College in Oranjestad.

REV. PASTOOR Burgemeester ta bendiciona un di e ocho klasnan nobo den St. Tarcisius College (ariba banda drechi), na banda robes el a bendiciona crucificadonan pa e klasnan mientras ariba studiantenan ta diverti ariba e patio di e school nobo cual tabata trahá pa juda e over-crowding cu tin na St. Dominicus College na Oranjestad.

Engineers' Club Plans 7-Session Process Seminar

The Engineers' Club - in keeping with its practice of making available speakers and topics important to the petroleum refining industry - will offer a seven-session Process Seminar beginning Feb. 20. The sessions will be held in the General Office Building conference room Monday and Thursday evenings.

All hour-long sessions, they will begin with the topic of "TSD Process Design Engineering" as presented by D. W. Schureh Monday, Feb. 20. The sessions to follow are "TSD Engineering Group - Section I" by R. A. Pearson, "TSD - Equipment" by H. J. Richardson, "Process Department - Operators" by W. H. Norris, "Mechanical Department - Zone Supervision, Planning and Engineering Group" by W. F. Hughes, "Process Department - Laboratory No. 3" by D. A. Domes and "Management" by General Manager F. E. Griffin.

The seminar is open to all refinery personnel on an application basis. A registration fee of Fls. 5 will be charged and returned upon successful completion of the course. Applications may be obtained from R. C. Bergfield of Mechanical Administration. In the event the number of applications exceeds the number of conference room seats, an impartial drawing will be held. All applications must be submitted to Mr. Bergfield by Feb. 15.

The planned seminar, entitled "PCAR - Catalytic Cracking Unit, General Inspection, is another of many like programs the Engineers' Club has conducted for a number of years.

Aruba Okays Plan for More Power, Water

The Aruba Island Council has approved a proposed expansion of the island's sea-water distillation and electricity generation facilities. Cost of the project is estimated at Fls. 20,000,000.

The plans call for raising the island's fresh-water production from 2300 to 13,000 tons per day by installing four new distillation units and increasing the capacity of existing equipment.

The new equipment will provide additional electricity generating facilities.

Deputy O. S. Henriquez, speaking for the government on the project, said increased water and power facilities were necessary to supply future industrial and agricultural needs and to reduce the cost of these utilities to house hold consumers.

The government proposes to finance the project through a bond issue. The Lago Thrift Foundation announced it would invest in the bonds if the issuance terms met the foundation's specifications.

Lago announced it would withhold a decision on its proposed purchase of fresh water pending the availability of the water.

Current plans call for installation of the new equipment west of the existing water plant at Balashi.

Visiting Medics Stop at Lago

Men and women physicians of the Pan American Congress of Physical Medicine visited Lago Feb. 8. They numbered 23 and all came from the United States. They were accompanied by three Curacao physicians and in Aruba were joined by three doctors of the organizing committee.

One of their first stops in Aruba was San Pedro Hospital. From that stop in Oranjestad they proceeded to Lago where Dr. R. C. Carroll and Dr. R. F. Erace journeyed with the physicians on tours of the Employee Medical Center and the Lago Hospital.

While on the Lago concession they had lunch and heard discussions by Dr. Carroll and a representative of the government medical service.

Aseguro di Bida Lo Bai Efectivo Feb. 9

Proteccion di Aseguro di Bida en Grupo a drenta na vigor na Dia-luebes, Feb. 9 pa empleadonan di Lago cu a firma den e plan ariba e fecha aki. Ainda e plan ta habri pa empleadonan staff y regular cu na e firma.

American Life Insurance Company cu ta financia e plan cu ta worde presentá ad auspicio di Special Problems Advisory Committee, a combini pa pone e plan na vigor maske cu 75 por ciento di empleadonan staff y regular: no a firma.

Originalmente e compania di aseguro a pone 75 por ciento of mas of menos 4200 empleadonan como e porcentaje requeri promer cu e compania por tumá e risiko. Anunciando cu e plan di aseguro en grupo a worde poni na vigor, sin embargo, American Life a declara cu e edad promedio di e empleadonan cu a firma - 36.6 anja - tabata haci e promedio expectitud di bida suficiente largo pa hustifia e risiko.

Empleadonan cu ta desea di firma pa e aseguro por haci asina na oficina di SPAC, A. Zambrano na Industrial Relations Department y Employment Annex na Porta Mayor.

Crude Pier Is Now East Pier

Lago's new Crude Pier, opened last year as a replacement for the out-dated Lake Tanker Docks, will henceforth be known as the East Pier.

General Manager F. E. Griffin, in announcing the name change, said the Crude Pier designation was discontinued because "Naming of piers in accordance with crude or products handled tends to cause some confusion in records and terminology when services are changed."

Wernet To Study Accident Prevention In United States

Aiming at the continuance of effective accident prevention, Lago has sent Safety Inspector Francisco Wernet to the United States to study the accident prevention programs of three other organizations affiliated with the Standard Oil Co. (N.J.)

Mr. Wernet, who left Aruba Feb. 2, will spend about six months at the Bayonne and Bayway refineries of the Esso Standard Oil Co. in New Jersey and at the Esso Research and Engineering Co. in Linden, N.J.

He will study the three divisions' field work; development of programs and activities; accident investigation procedures; publicity and publication programs; survey and reporting practices; inspection routines; safety equipment issuance and maintenance.

A MULO school graduate, Mr. Wernet will also be enrolled in some Adult Education Courses at an Elizabeth, N.J., high school. He will study English, chemistry, physics and other subjects applicable to his work as a safety inspector.

He is also scheduled to attend classes in the Basics of Supervision Course offered at the Esso Training Center in Elizabeth. He will live with the family of an Esso employee during the all-expense-training trip.

Mr. Wernet, a Lago employee for over six years, was chosen by the Safety Division to make the trip because of his educational qualifications and his over-all familiarity with Lago's accident prevention program and problems.

One phase of his study will be to note the differences between Lago's accident prevention program and the programs of the three other Jersey organizations and to evaluate the effectiveness of their possible adoption here.

FRANCISCO WERNET, shown here performing one of his tasks as safety inspector, will study accident prevention in the United States. FRANCISCO WERNET, actuando den un di su trabanonan como safety inspector, lo studia pa prevention di accidente na Estados Unidos.

ate the effectiveness of their possible adoption here.

Married and the father of three children, Mr. Wernet attended the Don Bosco School in Aruba for six years, then completed four years at St. Thomas College in Curacao and graduated with a MULO degree.

In 1949 he was employed in Lago's Technical Service Department where he was assigned as an instructor B to the Training Division.

In 1953 he transferred to the Safety Division as a safety assistant B. He was later promoted to safety assistant A and now occupies the position of safety inspector A.

He also served as an alternate national member of the Lago Employee Council.

Mr. Wernet's assignment is in ac-

cordance with Lago's policy of providing additional training for qualified employees in order to better equip them for their work. During 1955 employees of the Mechanical, Technical Service and Accounting Departments took additional training in the U.S.

Camina Nobo

(Continua di pagina 1)

pa of for di trabao via Sea Grape Gate, door di usa e camina nobo, lo evita e congestion cu ta existi awor den vecindario di Esso Post Office, e dos sitionan unda 3rd St. y Avenida 7 ta cruza e camina mayor di refinaria y otro puntonan ariba e ruta.

Trabao ariba e camina nobo ta planea pa cuminsa den segunda cuartal di 1956 y e lo bini cla promer cu fin di anja.

RESPLENDENT in green and yellow, the new Esso Dining Hall opened its doors earlier this month across the street from the Esso Post Office. Above, the many-windowed building; below at left, the spanking new kitchen; below at right, the sun-lit dining room.

MAJESTUOSAMENTE den color berde cu geel, Esso Dining Hall nobo a habri su portanan mas tempran e luna aki na otro banda di caya dilanto Esso Post Office. Ariba, e edificio cu hopi bentana; abao banda robez, e cushina nobo; abao banda dreechi, e sala comedor.
